

I researched several systems and had several companies come out and do a sight survey. We chose 3D Maximum Security out of Henderson, Texas.

We had a 13 camera system installed with two of the cameras being a programmable pan tilt zoom camera. The rest of the cameras are all stationary cameras. As a Police Officer I have really appreciated what they do for us. We have used them to solve a lot of small mysteries. The service has been great and the company was fast to get here to install and help train us on the use. What minor problems we have had they have been fast to get here and solve them for us.
